Search Notes

Dear David,

I could not find an instance of a server embedding code and sending it to an agent in the type of transaction environment envisioned by the applicants' claims. Please let me know if you have any questions.

Lance

STIC EIC 2100 Search Request Form

Today's Date: 10/31/2006

What date would you like to use to limit the search?

Priority Date: 6/16/1999 Other: _____

Name David England

AU 2143 Examiner # 79451

Room # 4D64 Phone 571-272-3912

Serial # 101615164

Format for Search Results (Circle One):

PAPER DISK EMAIL

Where have you searched so far?

USP DWPI EPO JPO ACM IBM TDB

IEEE INSPEC SPI Other _____

Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC2100 and on the EIC2100 NPL Web Page at <http://ptoweb/patents/stic/stic-tc2100.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Is this request for a BOARD of APPEALS case? (Circle One) YES NO

Is this case a SPECIAL CASE? (Circle One) YES NO

• (embedding) near# (code or command)
or editing

• the last two limitations

• (filter rules or condition or criteria) with (message page site document)

• Novelty: user sends a message to an agent with specific condition about how to display it, sends it to a server, server puts in code + sends it to the agent based on the conditions, while sending the original message back to the user unedited.

Patent Details

Patent Number	Kind	Lan	Pgs	Draw	Filing Notes
---------------	------	-----	-----	------	--------------

USE - For processing information used in information processors connected to Internet.

ADVANTAGE - Changes collaborating client behavior according to context during Internet based collaboration. Enables administrator to intentionally change the context requested by a client. Provides low cost collaboration system. Resources required while supporting an information terminal are reduced. Centralized control is possible during information terminal support.

DESCRIPTION OF DRAWINGS - The figure shows the block diagram of processing elements of the collaboration system.

Alerting Abstract WO A2

NOVELTY - An hypertext transfer protocol (HTTP) message sent in response to a customer side browser request, is received at the information terminal support server. It is determined whether the message is in accord with predetermined condition. If it is in accord, the contents of the message are edited. The unedited and edited messages are sent to the customer and agent side browsers respectively.

DESCRIPTION - The method involves editing the contents of the HTTP message received at the information terminal support server to insert a command for the client program loaded on the agent side information terminal. The command is one of form submit prohibition', form alternation prohibition', concealment of specific form' or concealment of specific field'. INDEPENDENT CLAIMS are also included for the following:

- A. Information terminal server;
- B. Collaboration system;
- C. Information processing program;
- D. Program recording medium
